

Safety Data Sheet GEMCOAT 550 VOC PC PRIMER (1G)

1. Identification	
Product identifier	ÁÕÒT ÔUŒVÁÍÍ €ÁKU ÔÁÚÔÁÚÜŒ ÒÜÁÇFŐD
Product code	ÁFF€E€FÌ-1
Other means of identification	None.
Recommended use of the chemical and restrictions on use	A protective and/or decorative finish or accompanying product. Not recommended for any other use not detailed on product data sheet or label.
Manufacturer	GEMINI INDUSTRIES, INC. 2300 Holloway Drive El Reno, OK 73036 USA Tel. 1-800-262-5710 Fax 1-405-262-9310 http://www.gemini-coatings.com/
Emergency phone number	24-hour Emergency (spill, leak, exposure or accident) INFOTRAC 800-535-5053 Outside USA, Call Collect 1-352-323-3500 (French & English) HAZMAT Response and SDS Help: EMI 800-510-8510

2. Hazard identification

Summary

Extremely flammable liquid and vapors. Keep away from heat, sparks and open flame. Avoid contact with skin, eyes and clothing. Do not breathe vapours, mists or aerosols. Do not ingest. If ingested consult physician immediately and show this Safety Data Sheet. Wear eye protection, gloves and other protective clothing that are adapted to the task being performed and the risks involved. P.S.: The SIMDUT 2015/GHS hazards classification in this SDS is provided by the manufacturer using a Worst-Case Scenario.

WHMIS 2015/GHS/OSHA HCS 2012

Flammable liquids (Category 1)

Serious eye damage/eye irritation (Category 2)

Carcinogenicity (Category 1)

Reproductive toxicity (Category 1)

Specific target organ toxicity, single exposure (Category 3) Specific target organ toxicity, repeated exposure (Category 2)

DANGER

H224: Extremely flammable liquid and vapour

H350: May cause cancer

H360: May damage fertility or the unborn child

H319: Causes serious eye irritation

H336: May cause drowsiness or dizziness

H373: May cause damage to organs through prolonged or repeated exposure by inhalation

H316: Causes mild skin irritation

P201: Obtain special instructions before use.

P202: Do not handle until all safety precautions have been read and understood.

P210: Keep away from heat, sparks, open flames and other ignition sources. No smoking.

P240: Ground or bond container and receiving equipment.

P241: Use explosion-proof electrical equipment.

P242: Use only non-sparking tools.

P243: Take precautionary measures against static discharge.

P260: Do not breathe vapours and spray.

P264: Wash skin thoroughly after handling.

P271: Use only outdoors or in a well-ventilated area.

P280: Wear protective gloves, protective clothing and eye protection.

P308+313: IF exposed or concerned: Get medical attention.

P314: Get medical advice/attention if you feel unwell.

P303+361+353: IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water.

P332+313: If skin irritation occurs: Get medical advice or attention.

P304+340+P312: IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call a POISON CENTER or physician if you feel unwell.

P305+351+338: IF IN EYES: Rinse continuously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing.

P337+313: If eye irritation persists: Get medical advice or attention.

P370+378: In case of fire: Use the National Fire Protection Association Class B extinguisher to extinguish.

P403+P235+P233: Store in a well-ventilated place. Keep container tightly closed. Keep cool.

P405: Store locked up.

P501: Dispose of contents and container to a licensed chemical disposal agency in accordance with local, regional and national regulations.

Other hazards which do not result in classification

Skin corrosion/irritation (Category 3).

3. Composition/information on ingredients						
Common name	CAS	Weight % content				
Ethyl alcohol	64-17-5	10 - 30 %				
Kaolin	1332-58-7	10 - 30 %				
Titanium dioxide	13463-67-7	10 - 30 %				
Butyl acetate (normal)	123-86-4	10 - 30 %				
Dimethyl carbonate	616-38-6	5 - 10 %				
Urea, polymer with formaldehyde, isobutylated	68002-18-6	5 - 10 %				
Propane, 1-nitro-	108-03-2	5 - 10 %				
Nitrocellulose	9004-70-0	1 - 5 %				
Isobutyl alcohol	78-83-1	1 - 5 %				
Isopropyl alcohol	67-63-0	1 - 5 %				
Xylene	1330-20-7	1 - 5 %				
Acetone	67-64-1	1 - 5 %				
Synthetic Amorphous Fumed Silica	112945-52-5	1 - 5 %				
Ethylbenzene	100-41-4	0.1 - 1 %				

4. First-aid	4. First-aid measures				
Inhalation	Move person to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen by trained personnel. If a problem develops or persists, seek medical attention.				
Skin contact	Wash skin with warm water and mild soap. Remove contaminated clothing and wash before reuse. If a problem develops or persists, seek medical attention.				
Eye contact	IMMEDIATELY! Flush with water for at least 15 minutes. Remove contact lenses if easy to do. Hold eyelids apart to rinse properly. If a problem develops or persists, seek medical attention.				
Ingestion	DO NOT induce vomiting, unless recommended by medical personnel. Never give anything by mouth if victim is unconscious or convulsing. If victim is conscious wash out mouth with water and give 1-2 glasses of water to drink. Seek medical attention or contact a Poison Centre immediately.				
Other	No information available.				
Symptoms	May cause irritation, redness, tearing and blurred vision. May cause redness, dryness, rash and slight skin irritation. May cause headache, drowsiness or dizziness.				
Notes to the physician	Treat symptomatically. If gastric lavage is performed, suggest endotracheal and/or esophageal control. Danger from lung aspiration must be weighed against toxicity when considering emptying the stomach. Treatment of exposure should be directed at the control of symptoms and the clinical condition of the patient.				

5. Fire-fighting measures					
Suitable extinguishing media	Dry chemicals, alcohol resistant foam, carbon dioxide (CO2). Do not use a heavy water jet.				
Specific hazards arising from the chemical	Extremely flammable liquid and vapors. Vapours are heavier than air and may travel to an ignition source distant from the material handling point. May be ignited by heat, sparks, flame or static electricity. Do not apply to hot surfaces.				
Special protective equipment	Firefighters must wear self contained breathing apparatus with full face mask. Firefighting suit may not be efficient against chemicals.				
Special protective actions for fire-fighters	Use water spray to cool fire-exposed containers. Prevent run-off from fire control or dilution from entering streams, sewers or drinking water supply.				

6. Accidental rel	6. Accidental release measures				
Personal precautions, protective equipment and emergency procedures	Do not touch spilled material. Make sure to wear personal protective equipment mentioned in this Safety Data Sheet.				
Environmental precautions	Prevent entry into sewers, closed areas and release to the environment. For a large spill, consult the Department of Environment or the relevant authorities.				
Methods and materials for containment and cleaning up	Remove sources of ignition. Ventilate the area well. Absorb with inert material (soil, sand, vermiculite) and place in an appropriate waste disposal clearly identified. Use non-sparking and antistatic tools. Dispose via a licensed waste disposal contractor. Finish cleaning the contaminated surface by rinsing with soapy water.				

7. Handling and storage				
Precautions for safe handling	Keep away from heat, sparks and open flame. Turn off all pilot lights, flames, stoves, heaters, electric motors, welding equipment and other sources of ignition. Use non-sparking and antistatic tools. Use only in well ventilated area. Do not breathe vapors. Avoid contact with skin, eyes and clothing. Wear eye protection, gloves and other protective clothing that are adapted to the task being performed and the risks involved. Keep containers tightly closed when not in use. Do not eat, do not drink and do not smoke during use. After use, wash hands with soap and water. Wash contaminated clothing before reuse.			
Conditions for safe storage, including any incompatibilities	Storage and handling should follow the NFPA 30 Flammable and/or Combustible Liquids Code and the National Fire Code of Canada (NFCC). Store tightly closed and in properly labelled container in a dry, cool and well ventilated place. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Store away from oxidizing materials and incompatible materials (see section 10). Keep away from direct sunlight and heat.			
Storage temperature	5 to 30°C (41 to 86°F)			

8. Exposure controls/personal protection						
Immediately Dangerous to Life or Health	Ethyl alcohol: 3300 ppm.					
Ethyl alcohol	STEL		1000 ppm		ACGIH, BC, ON, RSST

	Total Dust		10 mg/m ³	ACGIH , ON		
Isobutyl alcohol	TWA (8h)	50 ppm		ACGIH , BC, ON		
		50 ppm	152 mg/m ³	RSST		
Ethylbenzene	TWA (8h)	20 ppm		ACGIH , BC, ON, RSST		
Appropriate engineering controls		Provide sufficient mechanical ventilation (general or local exhaust) to keep the airborne concentrations of vapours, mists, aerosols or dust below their respective occupational exposure limits.				
Individual protection m	easures					
Eye	In the workplace, wear safety glasses with side shields. If risk of contact with eyes or/and the face wear chemical splash goggles and/or a face shield.					
Hands	Wear nitrile or neoprene gloves. Before using, user should confirm impermeability. Discard gloves with tears, pinholes, or signs of wear. Gloves must only be worn on clean hands.					
Skin	Personal protective equipment for the body should be selected based on the task being performed and the risks involved. Wear normal work clothing covering arms and legs as required by employer code. If necessary, wear an apron or long-sleeve protective coverall suit.					
Respiratory	Respiratory protection is not required for normal use. Where the conditions in the workplace require a respirator, it is necessary to follow a respiratory protection program. Moreover, respiratory protection equipment (RPE) must be selected, fitted, maintained and inspected in accordance with regulations and standard 29 CFR 1910.134 (OSHA), ANSI Z88.2 or CSA Z 94.11 (Canada) and approved by NIOSH/MSHA. In case of insufficient ventilation or in confined or enclosed space and for an assigned protection factor (APF) up to 10 times the exposure limit, wear a half mask respirator with organic vapour cartridges fitted with P100 filters. For an APF until maximum 100 times of exposure limit, wear a full face respirator mask with organic vapour cartridges and P100 filters.					
Feet	Wear rubber boots to clean up a spill.					

9. Physical and	l chemical properties		
Physical state	Liquid	Flammability	Flammable
Colour	Coloured	Flammability limits	N/Av.
Odour	Solvent	Flash point	0°C (32°F)
Odour threshold	N/Av.	Auto-ignition temperature	170°C (338°F)
рН	N/Av.	Sensibility to electrostatic charges	Yes
Melting point	N/Av.	Sensibility to sparks and/or friction	No
Freezing point	N/Av.	Vapour density	>1 (Air = 1)
Boiling point	34 to 3000°C (93.2 to 5432°F)	Relative density	1.2186 kg/L (Water = 1)
Solubility	Partially soluble in water.	Partition coefficient n-octanol/water	N/Av.
Evaporation rate	> Butyl Acetate	Decomposition temperature	N/Av.
Vapour pressure	N/Av.	Viscosity	N/Av.
Percent Wt. Volatile	48.7496%	Molecular mass	N/Ap.

VOC (g/L)	486.2875 g/L % Volume Volatile (VOC)		57.4395%	
VOC (lb/gal)	4.0581 lb/g	al	% Wt. Volatile (VOC)	39.9943%
	N/Av.: Not Available	N/Ap.: Not Applicable	Und.: Undetermined	N/E: Not Established

10. Stability and reactivity				
Reactivity	No reactivity expected.			
Chemical stability	Stable under recommended storage conditions.			
Possibility of hazardous reactions (including polymerizations)	A dangerous reaction will not occur.			
Conditions to avoid	Avoid heat, flame and sparks. Avoid static discharge. Avoid contact with incompatible materials.			
Incompatible materials	Strong oxidizing agents (e.g. chlorine, fluorine, nitric acid, perchloric acid, peroxides, nitrates, chlorates, chromates, permanganates and perchlorates), strong acids (e.g. hydrochloric acid, sulfuric acid, phosphoric acid), strong bases (e.g. hydroxides, solutions of ammonia, amines, carbonates).			
Hazardous decomposition products	Under normal conditions of storage and use, hazardous decomposition products should not be produced.

		Isobutyl alcohol				
		Xylene				
		Ethylbenzene		2	B -	
		IARC : 1- Carcinogenic; 2A- Probably NTP : K- Known to be carcinogens; F				
	Carcinogenicity	Contains material which of	an cause	cancer. There i	s suffici	ent evidence for the
		carcinogenicity of alcoholic (Ethanol) beverages in humans (IARC). The occurrence of				
		malignant tumors of the oral cavity, pharynx, larynx, oesophagus, liver, breast and colorectal is causally related to the excessive consumption of alcoholic beverages. Titanium dioxide in dust form can cause cancer (through inhalation) based on animal data. Although IARC has classified titanium dioxide as possibly carcinogenic to humans (2B), their summary concludes: No significant exposure to titanium dioxide is thought to occur during the use of products in which titanium dioxide is bound to other materials, such as paint and caulk. Ethylbenzene is a proven carcinogen to animals and a possible carcinogen to humans. The risk of cancer depends on duration and level of exposure. Ingredients in this product present at levels greater than or equal to 0.1% are not				
	Mutagenicity	ingredients in this produc	ı present a	ı ieveis greater	ınan or	equal to 0.1% are not

	Reproductive toxicity	known to cause mutagenic effects. Major malformations have been reported in infants born of women who had been working with solvent-based paints (oil-based paints) during pregnancy. Therefore, long-term exposure to solvent-based paints that may occur in occupational life can affect a developing baby (American Journal of Industrial Medicine, 1980). Xylene (CAS no 1330-20-7) overexposure may affect fetal development in laboratory animals by inhalation during pregnancy.		
	Specific target organ toxicity - single exposure Specific target organ toxicity - repeated exposure	Central nervous system. Central nervous system, hearing organs, kidneys, liver.		
Interactive effects	No information available for this product.			
Other information	The oral and skin acute toxicity estimates (ATE) of the mixture were calculated to be greater than 2000 mg/kg. The acute toxicity estimate (ATE) by inhalation of the mixture was calculated to be greater than 20 mg/L/4h. These values are not classified according to WHMIS 2015 and OSHA HCS 2012.			

12. Ecologic	cal information		
Ecological toxicity	Fish - Pimephales promelas [flow-through]	LC50	13400 mg/L; 96 h (CAS no 64-17-5)
	Aquatic Invertebrate - Daphnia magna	EC50	9268 mg/L; 48 h (CAS no 64-17-5)
	Fish - Pimephales promelas - Fresh water	LC50	>500 mg/L; 96 h (CAS no 13463-67-7)
	Aquatic Invertebrate - Daphnia magna (Water flea)	EC50	>1000 mg/L; 48 h (CAS no 13463-67-7)
	Fish - Pimephales promelas [flow-through]	LC50	18 mg/L; 96 h (CAS no 123-86-4)
	Aquatic Invertebrate - Daphnia magna	EC50	44 mg/L; 48 h (CAS no 123-86-4)
	Algea, Pseudokirchneriella subcapitata	EC50	579 mg/L; 96 h (CAS no 9004-70-0)
	Fish - Rainbow trout - Oncorhynchus mykiss	LC50	227 mg/L; 96 h (CAS no 108-03-2)
	Aquatic Invertebrate - Crustaceans - Daphnia Magna	EC50	380 mg/L; 48 h (CAS no 108-03-2)
	Fish - Pimephales promelas - Fresh water	LC50	1370-1670 mg/L; 96 h (CAS no 78-83-1)
	Aquatic Invertebrate - Daphnia magna	EC50	1300 mg/L; 48 h (CAS no 78-83-1)
	Fish - Fathead minnow, Pimephales promelas - fresh water	LC50	9640 mg/L; 96 h (CAS no 67-63-0)
	Aquatic Invertebrate - Crustaceans, Daphnia Magna	EC50	3644 mg/L; 48 h (CAS no 67-63-0)
	Fish - Oncorhynchus mykiss - Rainbow trout	LC50	13.5-17.3 mg/L; 96 h (CAS no 1330-20-7)
	Aquatic Invertebrate - Daphnia magna	EC50	3.82 mg/L; 48 h (CAS no 1330-20-7)
	Fish - Oncorhynchus mykiss - Rainbow trout	LC50	4740 mg/L; 96 h (CAS no 67-64-1)

1			

	Aquatic Invertebrate - Daphnia magna	EC50	>10000 mg/L; 24 h (CAS no 112945-52-5)				
Persistence	Contains an or many ingredients that may be persistent in aquatic environment.						
Degradability	The product is a mixture of which some ingredients are readily biodegradable (> 60% in 28 days) while other ingredients are not readily biodegradable (<60% in 28 days).						
Bioaccumulative potential	The product is a mixture of which some ingredients have a low bioaccumulation potential (Log Kow of <3 and / or BCF <500) while other ingredients have some potential to bioaccumulate (Log Kow of >3 and / or BCF >500).						
Mobility in soil	The product is a mixture of which some ingredients evaporate very easily from the surface of the soil. Moreover, some ingredients have very high mobility in soil, while other ingredients have moderate to low mobility in soil.						
Other adverse effects	This chemical does not deplete the ozone layer.
