

LENMAR®

QUICKSTAIN® DYE STAINS & CONCENTRATES

Uniquely designed for the professional woodworker

Lenmar® QuickStain® Dye Stains and Concentrates are uniquely designed for professionals in the furniture and cabinet industry and are formulated strictly for use in shop applications only.

DYE CONCENTRATES ARE AVAILABLE IN 6 BASIC DYE COLORS

- 1U.601 Blue Concentrate
- 1U.602 Red Concentrate
- 1U.603 Yellow Concentrate
- 1U.604 Orange Concentrate
- 1U.606 Black Concentrate
- 1U.607 Brown Concentrate

Dye concentrates may be mixed into many solvents, primarily acetone and lacquer thinner and applied as spray stains / NGRs. These concentrates can be added to sealers or topcoats or can be made into toners and shade stains to add color and depth to a finish.

QuickStain® Dye Concentrates should not be used without dilution into an acceptable solvent or base. They are designed for use by spray only. Do not attempt to wipe or brush onto the substrate.

DYE STAINS ARE AVAILABLE IN 4 READY-TO-SPRAY STAIN SHADES

- 1U.608 Cordovan Dye Stain
- 1U.609 Cherry Dye Stain
- 1U.610 Oak Dye Stain
- 1U.611 Walnut Dye Stain

Lenmar® QuickStain® Dye Stains can be used with or without dilution. These stains are designed for spray application only, and if properly applied is a safe method for achieving dark colors without risking poor adhesion. These stains can be adjusted for color with Lenmar's QuickStain® Dye Concentrates and can also be reduced with acetone or lacquer thinner to achieve less intense colors, but still add depth and brightness to a finish. These dye stains should be one step in a multi-step color finish.
