

STAIN BLENDING Color System

Do you need a staining process that is more efficient, effective and organized? The Gemini Stain Blending Color System is your answer!

The Gemini Stain Blending Color System is a mixing station using an intermix of 9 concentrate stain colors and one clear base. Each of the nine concentrate colors are ready-to-use stains. By intermixing various combinations of these concentrates with the clear base you can easily make an endless selection of colors in a consistent and programmable process.

The complete stain blending system consists of the stain blending mixing system, nine concentrate colors and one clear base, a **67** color chip deck system in your choice of four substrates; **cherry, maple, oak or alder**, and a complete formula book for mixing the complete family of Gemini stain colors.

You will love the Gemini Stain Blending System!

This system eliminates time consuming trial and error color matching processes. By using the included color formulas or custom variations to your custom settings you can easily mix your needed stain colors and color matches again and again!

GEMINI INDUSTRIAL WOOD FINISHES
