

Safety Data Sheet 275 VOC PREMIUM C.V., SEMI-GLOSS, CLEAR

1. Identification		
Product identifier	275 VOC PREMIUM C.V., SEMI-GLOSS, CLEAR	
Product code	CV275-0060	
Other means of identification	None.	
Recommended use of the chemical and restrictions on use	A protective and/or decorative finish or accompanying paint product.	
Manufacturer	GEMINI INDUSTRIES, INC. 2300 Holloway Drive El Reno, OK 73036 Tel. 1-800-262-5710 Fax 1-405-262-9310 www.geminicoatings.com	
Emergency phone number	24-hour Emergency (Spill, Leak, Exposure or accident) INFOTRAC 800-535-5053 Outside USA, Call Collect 1-352-323-3500 (French & English)	
	HAZMAT Response and MSDS Help: EMI 800-510-8510	

2. Hazard identification Keep away from heat, sparks and open flame. Avoid contact with skin, eyes and clothing. Do not breathe vapours, mists or aerosols. Do not ingest. If ingested consult physician immediately and show this Safety Data Sheet. Wear Summary eye protection, gloves and other protective clothing that are adapted to the task being performed and the risks involved. WHMIS 2015/OSHA HCS 2012/GHS Flammable liquids (Category 3) Skin corrosion/irritation (Category 2) Serious eye damage/eye irritation (Category 1) Skin sensitizer (Category 1) Reproductive toxicity (Category 2) Specific target organ toxicity, single exposure (Category 3) Other hazards which do not result in classification : Acute hazard to the aquatic environment (Category 2). Long-term hazard to the aquatic environment (Category 2) DANGER H226: Flammable liquid and vapour H318: Causes serious eye damage H315: Causes skin irritation H317: May cause an allergic skin reaction H335: May cause respiratory irritation H336: May cause drowsiness or dizziness

H361: Suspected of damaging fertility or the unborn child

H411: Toxic to aquatic life with long lasting effects

P201: Obtain special instructions before use.

P202: Do not handle until all safety precautions have been read and understood.

P210: Keep away from heat, sparks, open flames and other ignition sources. No smoking.

P240: Ground or bond container and receiving equipment.

P242: Use only non-sparking tools.

P243: Take precautionary measures against static discharge.

P261: Avoid breathing vapours, mist and dust.

P264: Wash face, hands and any exposed skin thoroughly after handling.

P271: Use only outdoors or in a well-ventilated area.

P272: Contaminated work clothing should not be allowed out of the workplace.

P273: Avoid release to the environment.

P280: Wear protective gloves, protective clothing and eye protection.

P303+361+353: IF ON SKIN (or hair): Remove immediately all contaminated clothing. Rinse skin with water and soap or take a shower if necessary.

P333+313: If skin irritation or a rash occurs: Get medical advice/attention.

P304+340: IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305+351+338: IF IN EYES: Rinse continuously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing.

P310: Immediately call a POISON CENTER or doctor/physician.

P308+313: IF exposed or concerned: Get medical advice/attention.

P321: Specific treatment (see section 4 of SDS or on this label).

P362+364: Take off contaminated clothing and wash before reuse.

P370+378: In case of fire: Use the National Fire Protection Association Class B extinguisher for extinction.

P391: Collect spillage.

P403+P235+P233: Store in a well-ventilated place. Keep container tightly closed. Keep cool.

P405: Store locked up.

P501: Dispose of contents and container to an approved waste disposal plant.

3. Composition/information on ingredients			
Common name	CAS	Weight % content	
1-Chloro-4-(trifluoromethyl)benzene	98-56-6	32 - 33 %	
Urea, polymer with formaldehyde, butylated	68002-19-7	14 - 15 %	
n-Butyl Alcohol	71-36-3	11 - 12 %	
Methyl Propyl Ketone	107-87-9	1.5 - 2.5 %	
Propylene glycol monomethyl ether acetate	108-65-6	1 - 2 %	

4. First-aid measures		
Inhalation	Move person to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen by trained personnel. If a problem develops or persists, seek medical attention.	
Skin contact	Wash skin with warm water and mild soap for at least 15 minutes. Remove contaminated clothing and wash before reuse. Avoid touching eyes with contaminated body parts. If a problem develops or persists, seek medical attention.	
Eye contact	IMMEDIATELY flush with plenty of water. Remove contact lenses. Flush with water for at least 15 minutes. Hold eyelids apart to rinse properly. Seek medical attention immediately.	
Ingestion	DO NOT induce vomiting, unless recommended by medical personnel. If victim is conscious rinse mouth with water and give 1-2 glasses of water to drink. Never give anything by mouth if victim is unconscious or convulsing. If spontaneous vomiting occurs, keep head below hip level to prevent aspiration into the lungs. Seek medical attention or contact a Poison Centre immediately.	
Other	No information available.	

Symptoms	May cause severe eye irritation or eye damage. May cause redness and irritation of the skin. May cause an allergic reaction of the skin. May cause irritation to nose, throat and respiratory tract. Inhalation of vapours may cause central nervous system depression such as drowsiness, headache, dizziness, vertigo, nausea and fatigue.
Notes to the physician	Treat symptomatically. If lavage is performed, suggest endotracheal and/or esophageal control. Danger from lung aspiration must be weighed against toxicity when considering emptying the stomach. Treatment of exposure should be directed at the control of symptoms and the clinical condition of the patient.

5. Fire-fighting measures		
Suitable extinguishing media	Class B extinguishers. Dry chemicals, alcohol resistant foam, carbon dioxide (CO2). Do not use direct water jet.	
Specific hazards arising from the chemical	Flammable liquid and vapours. Vapours are heavier than air and may travel to an ignition source distant from the material handling point. May be ignited by heat, sparks, flame or static electricity. Do not apply to hot surfaces. Contact with strong oxidizers may cause fire. In a fire or if heated, a pressure increase will occur and the container may burst. Emits toxic fumes under fire conditions.	
Special protective equipment	Firefighters must wear self contained breathing apparatus with full face mask. Firefighting suit may not be efficient against chemicals.	
Special protective actions for fire-fighters	Use water spray to cool fire-exposed containers. Water spray can reduce the intensity of the flames. However, the water jets can spread the fire.	

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	Do not touch spilled material. Make sure to wear personal protective equipment mentioned in this Safety Data Sheet.
Environmental precautions	Prevent entry in sewer and other enclosed area. For a large spill, consult the Department of Environment or the relevant authorities.
Methods and materials for containment and cleaning up	Remove sources of ignition. Ventilate the area well. Stop leak, if it's possible to do so without risk. Absorb with inert material (soil, sand, vermiculite) and place in an appropriate waste disposal clearly identified. Use non-sparkling and antistatic tools. Dispose via a licensed waste disposal contractor. Finish cleaning the contaminated surface by rinsing with soapy water. PS: Rags and others materials soaked with paint or solvent may spontaneously catch fire if improperly store or discarded. Immediately after each use place rags and paper towels in a sealed water-filled metal container to prevent spontaneous combustion.

7. Handling and	storage
Precautions for safe handling	Keep away from heat, sparks and open flame. Turn off all pilot lights, flames, stoves, heaters, electric motors, welding equipment and other sources of ignition. Use non-sparkling and antistatic tools. Ground/bond all containers when transfer large quantities (5 gallons US or 20 L and more). Use only in well ventilated area. Avoid prolonged or repeated breathing of vapour or mists. Avoid contact with skin, eyes and clothing. Wear eye protection, gloves and other protective clothing that are adapted to the task being performed and the risks involved. Keep containers tightly closed when not used. Containers of this material may be hazardous when emptied. Since empty containers retain product residues (vapour, liquid), all hazard precautions given in this sheet must be observed. Do not eat, do not drink and do not smoke during use. Wash hands, forearms and face thoroughly after handling this compound and before eating, drinking or using toiletries. Remove contaminated clothing and wash before reuse. Rags, steel wool and paper towels soaked with this product may overheat and spontaneously ignite if piled in a heap. After use immediately store them in water-filled metal can with tight fitting lid.

Conditions for safe storage, including any incompatibilities	Storage and handling should follow the NFPA 30 Flammable and/or Combustible Liquids Code and the National Fire Code of Canada (NFCC). Store tightly closed and in properly labelled container in a dry, cool and well ventilated place. Ground/bond all containers when transfer large quantities (5 gallons US or 20 L and more). Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Store away from oxidizing materials and incompatible materials (see section 10).
Storage temperature	10 to 25°C (50 to 77°F)

8. Exposure controls/personal protection

Immediately Dangerous to Life or Health	N-Butyl Alcohol: 140 Methyl Propyl Keton				
n-Butyl Alcohol		Ceiling	30 ppm		BC
		U	50 ppm	152 mg/m ³	RSST (Pc, RP)
		TWA (8h)	15 ppm	-	BC
			20 ppm		ACGIH , ON
Methyl Propyl Ketone		Ceiling	150 ppm		ACGIH , ON
		STEL	250 ppm		BC
		TWA (8h)	150 ppm		BC
			150 ppm	530 mg/m ³	RSST
Propylene glycol monome	ethyl ether acetate	STEL	75 ppm	-	BC
	-	TWA (8h)	50 ppm		BC , US AIHA
			50 ppm	270 mg/m ³	ON
Individual protection me	easures Wear chemical splas	sh qoqqles.			
Hands	Wear nitrile or neoprene gloves. Disposable nitrile gloves can also be used, but discard after single use. Before using, user should confirm impermeability. Discard gloves with tears, pinholes, or signs of wear. Gloves must only be worn on clean hands. Wash gloves with water before removing them. After using gloves, hands should be washed and dried thoroughly.				
	Personal protective equipment for the body should be selected based on the task being performed and the risks involved. Wear normal work clothing covering arms and legs as required by employer code. Wear an apron or long-sleeve protective coverall suit.				
Skin	and the risks involve	ed. Wear normal w	ork clothing cove	ering arms and legs	
Skin Respiratory	and the risks involve code. Wear an aprove Respiratory protection be selected, fitted, m 94.4 and approved to space and for an assist mask respirator with	ed. 9. Physical and chemical properties			
Physical state	Liquid	Flammability	Flammable
Colour	Clear	Flammability limits	N/Av.
Odour	Solvent	Flash point	37°C (98.6°F)

Odour threshold	N/Av.	Auto-ignition temperature	N/Av.
рН	N/Av.	Sensibility to electrostatic charges	Yes
Melting point	N/Av.	Sensibility to sparks and/or friction	N.Av.
Freezing point	N/Av.	Vapour density	>1 (Air = 1)
Boiling point	102°C (215.6°F)	Relative density	1.1172 kg/L (Water = 1)
Solubility	Partially soluble in water.	Partition coefficient n-octanol/water	N/Av.
Evaporation rate	> Butyl Acetate	Decomposition temperature	N/Av.
Vapour pressure	N/Av.	Viscosity	N/Av.
Percent Volatile	49.3%	Molecular mass	N/Ap.
N/Av.:	Not Available N/Ap.: Not Applicable	Und.: Undetermined	N/E: Not Established

10. Stability and reactivity	
Reactivity	No information available.
Chemical stability	Stable under recommended storage conditions.
Possibility of hazardous reactions (including polymerizations)	A dangerous reaction will not occur.
Conditions to avoid	Avoid heat, flame and sparks. Avoid electro-static discharge. Avoid contact with incompatible materials.
Incompatible materials	Strong bases, mineral acids, strong oxidizing agents (such as nitric acid, perchloric acid, peroxides, chlorates and perchlorates).
Hazardous decomposition products	Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Numerical	1-Chloro-4-(trifluoromethyl)benzene	0	5546 mg/kg		LD50
measures of		Inhalation	20 mg/l/4h		
toxicity			33 mg/l/4h	Rat	LC50
		Skin	>2000 mg/kg	Rabbit	LD50
	n-Butyl Alcohol	Ingestion	2510 mg/kg	Rat	LD50
		Inhalation	24.2 mg/l/4h	Rat	LC50
		Skin	3400 mg/kg	Rabbit	LD50
	Methyl Propyl Ketone	Ingestion	3730 mg/kg	Rat	LD50
			1600 mg/kg	Mouse	LD50
		Inhalation	11 mg/l/4h	Rat	LC50
		Skin	6472 mg/kg	Rabbit	LD50
	Propylene glycol monomethyl ether acetate	Ingestion	8532 mg/kg	Rat	LD50
		•	28.7 mg/l/4h		LC50
		Skin	>5000 mg/kg		

Likely routes of exposure		
Delayed, immediate and chronic effects	Eye contact	May cause severe eye irritation or eye damage. Butyl Alcohol instilled in rabbit eyes resulted in severe corneal irritation and eye damage (OECD 405). Methyl n-propyl ketone is moderately irritating to the eyes of rabbits (OECD TG 405). 1-Chloro-4-(trifluoromethyl)benzene is not irritating in rabbits (in vivo test). Propylene glycol monomethyl ether acetate is not irritating to the eyes (rabbits, OECD GL 405).
	Skin contact	May cause redness, dryness, rash and skin irritation. Prolonged and repeated contact may cause dry skin, irritation or dermatitis. Widespread contact with skin for several hours can cause harmful amounts of material to be absorbed. The data indicate that butyl alcohol is irritating to the skin (Draize test). Methyl n-propyl ketone was considered to be a slight skin irritant (guinea pig, OECD TG 404). 1-Chloro-4-(trifluoromethyl)benzene is not irritating in rabbits (in vivo test). Propylene glycol monomethyl ether acetate is not irritating to the skin (rabbits, OECD GL 404).
	Inhalation	Excessive inhalation is harmful. May cause irritation to nose, throat and respiratory tract. Inhalation of vapours may cause central nervous system depression such as drowsiness, headache, dizziness, vertigo, nausea and fatigue. The severity of symptoms may vary depending on exposure conditions.
	Ingestion	May be harmful if swallowed. May cause gastro-intestinal irritation with nausea and vomiting. Ingestion of large amounts may cause depression of the central nervous system characterized by headache, dizziness, convulsions and loss of consciousness.
	Respiratory or skin sensitization IARC/NTP Classification	1-Chloro-4-(trifluoromethyl)benzene is a skin sensitizer (mouse, OECD TG 429). May cause an allergic reaction of the skin. This product is not a respiratory sensitizer. No ingredients listed.
	Carcinogenicity	Ingredients present at levels greater than or equal to 0.1% of this product are not listed as a carcinogen by IARC, ACGIH, NIOSH, NTP or OSHA.
	Mutagenicity	Ingredients in this product present at levels greater than or equal to 0.1% are not known to cause mutagenic effect.
	Reproductive toxicity	High vapor concentration exposure has an embryotoxic and/or foetotoxic effect on rats and rabbits at doses which mat be toxic to the animals
	Specific target organ toxicity - single exposure	Central nervous system, respiratory system.
	Specific target organ toxicity - repeated exposure	No target organ is listed.
Interactive effects	No information availa	ble for this product.
Other information	mg/kg. The acute tox	Ite toxicity estimates (ATE) of the mixture were calculated to be greater than 2000 icity estimate (ATE) by inhalation of the mixture was calculated to be greater than 20 s not classified according to GHS. These values are not classified according to WHMIS S 2012.

12. Ecological information

Ecological toxicity	Fish - Danio rerio	LC50	3.68 mg/L; 96h [1-Chloro-4-(trifluoromethyl)benzene)] OECD 203
	Fish - Danio rerio	CESO	2.2 mg/L; 72h [1-Chloro-4-(trifluoromethyl)benzene)] OECD 203
	Aquatic Invertebrate - Daphnia magna	EC50	3.68 mg/L; 48h [1-Chloro-4-(trifluoromethyl)benzene)] OECD 202
	Fish - Pimephales promelas [static]	LC50	1376 mg/L; 96h (n-Butyl Alcohol) OEDC 203
	Aquatic Invertebrate - Daphnia magna	EC50	1983 mg/L; 48h (n-Butyl Alcohol) OEDC 202
	Algea - Desmodesmus subspicatus	EC50	>500mg/L; 72h (n-Butyl Alcohol)
		LC50	100-180 mg/L; 96h (CAS no 108-65-6) OECD 203

	Fish - Oncorhynchus mykiss - Rainbow trout				
Persistence	The product contains components that may persist in the environment.				
Degradability	1-Chloro-4-(trifluoromethyl)benzene is not degraded by photolysis in water. It has also showed to be not ready biodegradable, 19.2% during 28 days (OECD TG 301D). n-Butyl Alcohol is readily biodegradable. Degradation by Biochemical Oxygen Demand BOD (O2 consumption) was reported as 92% after 20 days. Propylene glycol monomethyl ether acetate is readily biodegradable (83% in 10 days) OECD Guideline 301 E. Methyl propyl ketone (CAS no 107-87-9) has been shown to readily biodegrade at 70% under aerobic and conditions (OCDE TG 301D).				
Bioaccumulative potential	According to an estimated Bioconcentration Factors (BCF) of 110 in fish and an estimated partition coefficient log Kow of 3.6 suggest that 1-Chloro-4-(trifluoromethyl)benzene has a potential for bioaccumulation in aquatic organisms is high (TOXNET). Butyl Alcohol is soluble in water and has a low Bioconcentration Factor (BCF) of 3 and a log Kow of 0.88. BA would not be expected to accumulate in food chains. Propylene glycol monomethyl ether acetate is not expected to bioaccumulate based on a low partition coefficient (Log Kow 0.36). Methyl propyl ketone (CAS no 107-87-9) is soluble in water and has a low Bioconcentration Factor (BCF) of 3 and a log Kow of 0,93. Methyl propyl ketone is not be expected to accumulate in food chains.				
Mobility in soil	The Koc value of 1600 suggest that 1-Chloro-4-(trifluoromethyl)benzene is expected to have low mobility in soil (TOXNET). n-Butyl alcohol is soluble in water. The estimated Koc value of 3.2 suggests that it is expected to have very high mobility in soil. Propylene glycol monomethyl ether acetate is soluble in water and will be distributed to air (10.22%), water (89.73%), soil (0.03%), and sediment (0.02%). Methyl propyl ketone (CAS no 107-87-9) can be volatilized from moist soil surfaces (SRC). The estimated Koc value of 75 indicates that it is expected to have high mobility in soil.				
Other adverse effects	This chemical does not deplete the ozone layer.				

13. Disposal considerations

Container Source Container Supply. DO NOT puncture, cut, heat or burn container, even after use. Paint residues, including lacquers, stains, shellac, varnish, solvents and paint thinners, can be reprocessed (recycle) anywhere there is a recovery program. Dispose via a licensed waste disposal contractor. Observe all federal, state/provincial and municipal regulations. If necessary consult the Department of Environment or the relevant authorities.

14. Transport information					
UN Number	UN 1263				
UN Proper Shipping Name	PAINT				
Environmental hazards	This material does not contain marine pollutant.				
Special precautions for user	Permit required for transportation with proper placards displayed on vehicle.				
TDG - Transportation of Dangerous Goods (Canada)					

Transport hazard class(es)	Class 3
Packing group	
IMO/IMDG - Internationa	Il Maritime Transport
Classification	UN 1263. PAINT. Class 3, PG III. Emergency schedules (EmS-No) F-E, S-E
IATA - International Air	Transport Association
Classification	UN 1263. PAINT. Class 3, PG III.
	re provided as a customer service. As the shipper YOU remain responsible for complying with all applicable laws and regulations, including proper aging. In addition, if a domestic exemption exists, it is the responsibility of the shipper to define the application of it.
