

PRODUCT DATA SHEET

Premium Clear Waterborne Conversion Varnish

DESCRIPTION

MOD-00XX Series is a two-component, urethane modified, clear waterborne coating system that was designed to be used as a high performance coating in areas where excellent water and chemical resistance are necessary. This product meets all of the pertinent government regulations regarding emissions and meets or exceeds the performance parameters outlined by KCMA. For Wood Substrates Only. For Interior Use Only.

PRODUCT NUMBERS / SHEENSCOATING PROPERTIESPREPARATION INSTRUCTIONSMOD-0090 90 sheenViscosity: 23-27" #3 Zahn @ 77°Weight Solids: 33%Volume Solids: 28%MOD-0060 60 sheenWeight/Gallon: 8.6 lbs./galCoverage: 450sq ft. per gallon at one mil dry film thickness.Use M702R at 3 fluid ounces per gallonMOD-0020 20 sheenVOC (Act./material): 0.4 lbs./gal (less exempt solvents) or 48g/l*This product may be re-catalyzed once after the first 24 hour period and will remain stable for another 24 hours. After the second 24 hour period, all material must be discarded.PRODUCT ADVANTAGESDry Times: Air Dry: at 78° F, relative humidity 50% To touch: 10-15 minutes To handle: 25-35 minutes To sand/recoat: 45 minutesReduction: Thinning: Reduction is not necessary. If needed, water should be used for reducton. Very little water is needed to reduction. Very little water is needed to reduce viscosity, typically no more than 5% by volume.

Properties Relative humidity will affect the speed of drying. Ideal conditions are 75° F or warmer at 50%
Excellent Flow and Leveling humidity or less. Dry time will be faster at higher Retarder: If a slower dry time is desired.
 Minimum Grain Raise Minimum Grain Raise temperatures and lower humidity and equally slower at colder temperatures and higher humidity. use SOL-0090 at levels not to exceed 5%.
Resists Yellowing*
Durable Moisture and Chemical Note: Effective dry times will be lengthened if retarder is added.
Resistant Film
 Meets KCMA Requirements When Applied To Pot Life- 24 hours* Thinning this material may result in increasing the VOC levels of this product.
When Applied To For Life- 24 hours Increasing the VOC levels of this product. Manufacturer's Specifications Refer to your local regulations before
The Film Thickness Maximum DET for a complete thinning.
24 Hour Pot Life-Can Be Re- catalyzed* Dry Film Inconess: Maximum DF Flor a complete system must not exceed 4 dry mils.
* The coating will not protect the wood, Shelf Life: 12 months @77° F if unopened and
lightly stained wood substrates or pigmented stored in a cool dry area. Always rotate stock.
Storage: Protect product from freezing.
Note: These numbers represent actual control values
on a smooth, sanded substrate. Spray techniques, texture, and sealing as well as film thickness may give
different results on actual work, but they may be used for comparison. To the best of our knowledge, the
above technical data is true and accurate at the date
of issuance but is subject to change without prior notice.

The following supersedes any provision contained in the forms, letters and papers of your company. This product is designed and intended for professional application only. All products should be thoroughly tested under application conditions prior to use. The information contained herein is believed to be reliable. HOWEVER, GEMINI MAKES NO WARRANTY CONCERNING THIS PRODUCT, WHETHER EXPRESS OR IMPLIED, INCLUDING THE WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. UNDER NO CIRCUMSTANCES SHALL GEMINI BE LIABLE FOR SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR ANY OTHER DAMAGES FROM ALLEGED NEGLIGENCE, BREACH OF WARRANTY, STRICT LIABILITY, OR ANY OTHER LEGAL THEORY, ARISING OUT OF THE USE OR HANDLING OF THIS PRODUCT. THE SOLE REMEDY OF THE BUYER AND THE SOLE LIABLE TOR SPECIAL BE UNITED TO THE SUBJECT OF THE CLAIM OR THE MOUNT ACTUALLY PAID FOR SUCH PRODUCT, WHICHEVER IS LESS. TECHNICAL ADVICE FURNISHED BY GEMINI SHALL NOT CONSTITUTE AN EXPRESS WARRANTY, WHICH IS EXPRESSLY DISCLAIMED. ALL TECHNICAL ADVICE GIVEN IS ACCEPTED AT THE RISK OF THE BUYER. CAUTION: DANGER! FLAMMABLE! VAPORS MAY CAUSE FLASH FIRE. VAPOR HARMFUL. HARMFUL OR FATAL IF SWALLOWED. INJURIOUS TO EYES. KEEP OUT OF THE REACH OF CHILDREN! BEFORE using this product it is essential that the "Material Safety Data Sheet" describing the product as well as the "Product Label" be reviewed. If your company does not have such information or has any questions, contact the manufacturer.

PRODUCT DATA SHEET, MOD-00XX SERIES, CONTINUED

A Substrate preparation:

New wood: Remove any dirt, grease, glue or other contaminants. Moisture content of wood should be 7-9%. Sand to 150-180 grit. Proper sanding of wood is absolutely critical to achieve the best color development and adhesion of the coating to the substrate.

Old wood: Strip old finishes completely and remove all contaminants from the surface. Make sure the surface is dry, sand as required. Finish same as new wood.

Mixing Instructions:

Do Not Shake! Catalyze using M702R at 3 fluid ounces per gallon. Mix material thoroughly and during use. This product may be re-catalyzed once after the first 24 hour period and will remain stable for another 24 hours. After the second 24 hour period, all material must be discarded. Material may be mixed by hand or mechanical agitation at moderate speed.

Application:

If using this system over oil based stains- A test panel for adhesion checks must be prepared and adhesion with the system you intend to use should be verified before proceeding.

Using conventional, HVLP, airless, or air assisted equipment, apply this product at 3-4 wet mils per coat. Let dry a minimum of 45 minutes. Sand with 280-320 grit, no-fill sandpaper and remove sanding dust with clean compressed air, or tack rag. This product must be sanded in between coats to ensure proper adhesion. This product is designed to be used as a self-seal system.

Used as a self-seal system we recommend 2-3 coats of MOD-00XX series. Maximum dry film thickness of the complete system must not exceed 4 dry mils.

This product must not be polluted with oil, solvent based paint or the like and should not be applied to metal surfaces. When applying a water base coating the air, substrate & coating temp should be above 65 degrees F and the humidity should be less than 65%. Increased air flow and/or drying temperatures, including the use of infrared lighting for cure will significantly decrease dry times.

Recommended Tip Sizes:Conventional Air1.8-2.0 mmHVLP1.9-2.2 mmAirless8-10 thousandthsAir Assisted Airless-9-11 thousandths

Precautions:

These products are intended for Professional use only. Do not proceed if you are planning on mixing with other finishing systems or other manufacturer's products. Gemini will not be held liable for finish failures due to the improper use of our products or deviation from our finishing recommendations

Airless Equipment Usage:

Due to the nature of this product, when used in airless equipment that is not stainless steel system; pumps require daily flushing and cleaning. Do not leave product in the system overnight as discoloration can take place due to reaction between the coating and non-stainless metals.

Containers:

We supply this material in a lined or plastic container. All containers used in conjunction with storage and/or application of this product must be stainless steel, or plastic.

Clean up:

Use water to clean all equipment when material is in a liquid stage. Use 2:1 mixture of water and Butyl Cellosolve (SOL-0061) to remove semi-dried coating. Use Acetone to remove dried coating. Dispose of in accordance with Federal, State, and Local regulation regarding pollution.

Care and cleaning of this finish: Use a mild dishwashing liquid and a damp cloth to remove food, grease, and other residue. Wipe dry. Do not use cleaners that contain ammonia, bleach, or abrasives as this may damage the finish.
